# Understanding PowerSchool Parent Portal with Single Sign-On

## Introduction

PowerSchool's Parent Portal is a tool integrated into the PowerSchool Student Information System (SIS) specifically designed for parents and students. In order to create your Parent Account, you will need specific information from your student's school. The PowerSchool Parent Portal offers much:

- access to multiple students with one login
- a personalized account for each parent and guardian
- the ability for parents/guardians to retrieve their own login information

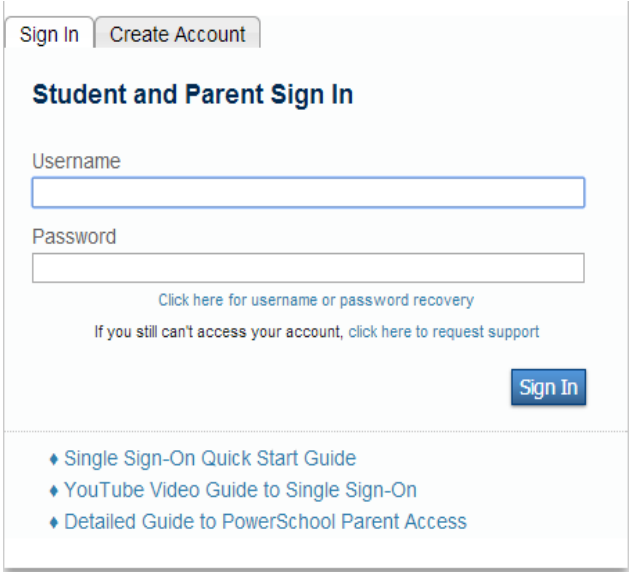

## Let's Get Started

To get started, you must create your PowerSchool account and attach your students.

### Creating your PowerSchool Parent Portal Account

Before you can log into PowerSchool Parent Portal, you will need to create your account and associate students to it. You should have received a letter with your students Access ID and Access Password. These values are needed to attach a student to your account. If you do not have this information or have questions, contact the main office at your child's school.

*Note: The Access ID and Access Password for your student should be protected. Only provide this information to individuals who need to monitor your student's progress.*
