

Grade 3 Curriculum

Readers' Workshop

Students will be exposed to a wide variety of literature as they read books that cover a variety of literary genres; biographies, historical fiction, fairy tales, mysteries, science, and social studies, as well as a choice of fiction books. The students will be participating in the Readers' Workshop program which consists of focus lessons that focus on a reading strategy, as well as one to one conferring with the teacher, guided reading groups, strategy groups, and literature circles. The Students will learn to talk about books while improving their reading comprehension and reading fluency.

Writers' Workshop

Like Readers workshop, students will participate in a focus lesson that models a specific writing skill or concept. Students will then practice this skill or concept into their own writing. Students will learn about nouns, pronouns, verbs and adjectives. They will learn to write a complete sentence with proper punctuation and a good, well written paragraph. Students will be encouraged to write two or more paragraph essays as well as a friendly letter. Poetry is another important component. Writing, reading, and listening to good poetry are emphasized throughout the year.

Word Study

Word Study, a component of Readers' Workshop, is the study of spelling, new vocabulary, word meaning, and word structure. Grade three spelling lists will consist of content words, commonly misspelled words, high frequency words and words within phonetic families. Grade three spelling assessments are based on tests and daily writing activities. In addition to spelling, students will also be using a program called Text Talk to learn new words and become familiar with compound words, synonyms, antonyms, homophones, figurative language, contractions, possessives, prefixes, suffixes, and root words. The goal of a word study program is to improve everyday spelling and understand written language.

Math

- Mastery of addition and subtraction facts through 18.

- Regrouping with addition and subtraction of 3 and 4 digit numbers.
- An introduction to basic geometry concepts, including perimeter and area, as well as a review of basic geometric shapes.
